

Cookbook of Activities for Driver Education

MT CURRICULUM GUIDE

M10

Objective: Targeting, Braking, and Accelerating through curves

INGREDIENTS

2" Masking/ Duct Tape
Large Space
20 feet of string
Simulated Steering Wheels

INSTRUCTIONS

Part 1

Mark off with tape, a right hand and a left hand curve on the floor. Lanes need to be about 3 feet wide.

Part 2

Demonstrate with the string on the floor, the path of travel through the curve

Part 3

Describe control brake, trail brake and acceleration and where they occur

Demonstrate control brake, trail brake and acceleration as you walk "drive" through the curve.

Part 4

Have student "drive" the curve. Watch students' eyes for targeting and feet for lane position on both a right hand and left hand curve.

Evaluate as they verbally state when they are using control & trail brake, and acceleration.
